

DELICAIR™ LAUNDRY BASIN

Delicate care
for the things
you wear.

AQUATIC

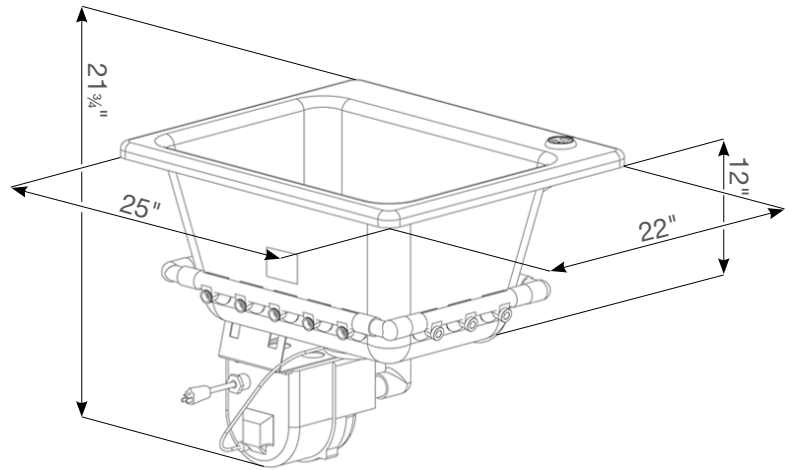

Real Luxury for Real Life.®

Aquatic Industries has built a reputation for quality, comfort and relaxing hydrotherapy. Now, we've applied our knowledge and expertise to the care of your most delicate clothing with the Delicair Laundry Basin.

Water. Air. Delicate Care.

Styles change. Fashions evolve, and many of today's garments require a gentler cleaning process to maintain their original color, design and structural integrity. The award-winning Delicair Laundry Basin by Aquatic is a laundry sink that operates on a similar principle as our renowned air bath system, lifting dirt away from fabric with gentle and effective bubble action. The cleaning power of effervescent bubbles without harsh agitators assures thorough cleaning of even the most delicate items.

The Delicair I features a 30-minute timer, an automatic purge and dry cycle, and a variable speed blower ideal for a wide range of fabric weights. The Delicair II is equipped with a simple on/off air switch. Both models include a deep interior well and a 10-year limited warranty. The Delicair Laundry Basin is also available as a sink-only model.

Occupying the same space as an ordinary utility sink, and requiring no additional plumbing, the Delicair Laundry Basin instantly updates laundry rooms both in purpose and style. It is also being installed in master bathrooms for added care and convenience, and is quickly becoming the latest must-have appliance for new homes and remodel projects. All Delicair models are made of durable acrylic material in white or biscuit, and are designed for drop-in or undermount installation.

Delicair I
